Six New Ranges | One Reputable Supplier

First Fence is proud to introduce the following range of agricultural wire netting products, each carefully developed to meet the highest standards of tensile strength, aperture accuracy, and overall finish. Designed with durability and reliability in mind, our netting solutions provide exceptional performance across a wide variety of agricultural applications, ensuring long-lasting protection and peace of mind for farmers, land managers, and rural property owners alike.

PastureGuard®

Manufactured with the First Fence Hinge Knot, the PastureGuard® range comes in light, medium, and heavy grades for general stock fencing.

StrainSure®

Manufactured using 1235–1390 N/mm² high-tensile wire, StrainSure® is ideal for demanding fence lines that need to remain under constant tension.

AntlerGuard®

Manufactured using the First Fence Fixed X Knot, the AntlerGuard® range is designed to prevent large animals, including deer, from trespassing.

EquiMesh®

Manufactured using 1235–1390 N/mm² high-tensile wire, EquiMesh® is ideal for equine areas where a large animal's weight must keep the fence intact.

AgriHex®

A lighter-grade galvanised hexagonal netting for rabbit, pheasant, chicken, and tree protection. Ideal for smaller animals needing less fencing strength.

StrainLine®

Mild steel and high-tensile wire available in 25 kg rolls, providing strength to any agricultural fence line.
