## Automatic & Semi-Automatic Bollards

First Fence Limited, the UK's leading manufacturer and supplier of security and temporary fencing, is proud to announce the official launch of its new range of premium bollards. Featuring world-renowned systems from Benito, Rise, and BFT, this expansion marks a significant step in the company's mission to provide comprehensive, high-tech access control solutions for the commercial, public, and private sectors.

As urban environments and industrial sites face increasing pressure to balance open pedestrian access with robust vehicle mitigation, First Fence has curated a selection of bollards designed for high-frequency use, rapid deployment, and architectural elegance.

# BENITO

**Benito Automatic Bollards:** Known for their sleek aesthetics and durability, the Benito range features rapid 4-second operation and built-in LED signaling rings. Crafted from AISI-304 satin stainless steel, they offer a "fail-safe" mechanism that lowers the shaft during power interruptions to ensure safe passage.

# RISE

Smart  
Moving

**Rise Spartacus Series:** Engineered for intensive use and high-security zones, the Rise range provides exceptional impact resistance. These systems are ideal for critical infrastructure and corporate headquarters where uncompromising reliability is non-negotiable.

**BFT Automation:** The BFT range offers a balance of strength and visibility. With IP67 ratings and the ability to perform up to 3,000 operations every 24 hours, their hydraulic bollards are perfect for high-traffic environments like shopping centres and government buildings. While the electromechanical options are ideal for residential settings.

## Automatic & Semi-Automatic Bollards

There is a huge range available across these 3 brands, here is a selection of the popular options available to create an unobtrusive, aesthetically pleasing, security solution to your site. As well as fully automatic options, each brand does have semi-automatic and static options available.

### **BENITO H6006:**

Ideal for residential sites, these heavy-duty hydraulic bollards are manufactured from AISI 304 Stainless Steel and have a red LED crown as standard. With an IP67 rating, these are built for even the toughest environment.

### **BENITO H6008:**

Like the H6006, these are manufactured of the same robust materials but are more suited to commercial settings. The LED crown changes red to green when lowered. Come with a PAS 68 impact resistance.

### **RISE Spartacus 275:**

Ideal for commercial sites, these hydraulic bollards can be either Stainless Steel or in a dark powder coated finish and offer heights of 600mm and 800mm. Up to 3,500 cycles a day and lowering speed of around 3-4 seconds.

### **RISE Spartacus 200:**

Hydraulic bollard ideal for both residential and commercial sites. Fast operation with a speed of 3-4 seconds and an LED crown as standard. Available in a dark powder coating or Stainless Steel and a height of 600mm or 800mm.

### **BFT Stopy MBB:**

Available in RAL 7015 or Stainless Steel - this electromechanical bollard comes with a reflective sticker and an LED crown for enhanced visibility. Available in 500mm or 700mm height.

### **BFT Stopy B 500:**

Ideal for residential entrances this small but effective electromechanical bollard comes in either RAL 7015 or Stainless Steel and measures 115mm wide X 500mm high.

## What This Means

"The addition of Benito, Rise, and BFT bollards to our portfolio allows us to offer more than just a physical barrier," said Jonathan Walker, Project Manager of Gates & Automation at First Fence Ltd.

"We are providing our clients with intelligent, automated security. Whether it's a smart city project or a private commercial or residential entrance, these systems integrate seamlessly into modern security infrastructures, offering peace of mind through automation."

"We've carefully curated this collection to ensure we have a solution for every level of risk—from the rapid-response reliability of BFT to the sleek, urban integration of Benito and the robust endurance of Rise. These systems offer seamless operation and advanced features like integrated LED lighting and fail-safe mechanisms, ensuring that our customers receive the most sophisticated access control technology available on the market today."
