First Fence Ltd, one of the UK's leading manufacturers and distributors of security and perimeter solutions, has announced the launch of its brand-new range of Automatic Residential Gates. Developed in exclusive partnership with premium European manufacturer Wiśniowski, this new domestic range combines high-end architectural design with state-of-the-art automation and smart access control.

This major product expansion marks a significant step forward for First Fence, bringing industrial-grade automation technology and robust security engineering directly to the UK's domestic and residential driveway markets.

The full range incorporates around 100 options, including classic 'wrought iron' style designs and ultra-modern solid boarded sheet metal options. Options are available in both steel and aluminium too.

Here are some of our favourite options.

Home Inclusive 228 - Steel

The Home Inclusive 228 is available with or without a light gap between the 230mm horizontal slats, allowing for either total privacy or to allow light and air to filter through.

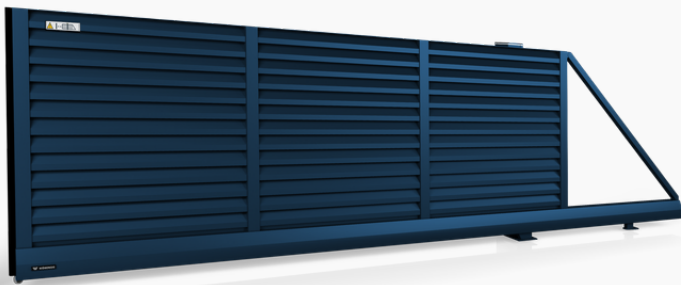

Home Inclusive 200 - Steel

This option can be manufactured with either 250mm or 500mm solid boarded horizontal slats - ultra-modern and perfect for matching with garage doors or external doors.

Home Inclusive 202 - Aluminium

The AL 202 is made from high-quality aluminium and offers a 100mm louvred slat infill, allowing a natural pass through of both light and air, whilst maintaining high-level security.

Modern 115 - Steel

The Modern range features a lot of different variations and infill types, but this one gives a neat, modern finish with 70mm X 20mm cross bars and vertical slats below.

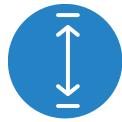

With over 100 designs to choose from, if you do not see exactly what you are looking for, contact our sales team and request a copy of the full catalogue to be sent, or download it from our website. It is available on every one of our residential automatic gate pages.

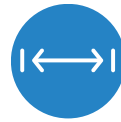

Sizes available:

Please note some of the range's available sizes are limited due to infill type.

1.1m to 2.1m

2.5m to 5m

Technical Facts:

2 Year
Warranty

Automation
Included

✓ Fully galvanised to **ISO 1461** & Powder coated to **BS EN 13438**

Installation Ease:

All our residential sliding automatic gates come with the automation installed (not possible with swing gates in the range)- meaning installation time is greatly reduced. All our gates come with photocells and additional safety options.

Built To Last:

All the gates we supply from this new range are galvanised and then powder-coated to a selection of colour options.

"We are incredibly excited to bring this premium residential range to the UK market in partnership with Wiśniowski. Homeowners are increasingly looking for driveway gates that offer both exceptional kerb appeal and sophisticated smart-home integration. By combining Wiśniowski's world-class manufacturing with First Fence's nationwide distribution, dedicated technical support, and rapid lead times, we're providing installers and homeowners with an unmatched complete package."

The gates are manufactured from both high-grade steel, hot-dip galvanised for superior corrosion resistance, or high-quality aluminium. Both options can be polyester powder-coated in a wide variety of RAL colours to match existing fencing, garage doors or windows or specific architectural requirements. The automated drive systems are built for intensive use cycles, offering smooth, quiet, and rapid deployment.

The new automated residential gate range is available to order immediately. First Fence supports every purchase with its dedicated in-house automation team, offering fast quotation turnaround, technical CAD drawing services, and reliable nationwide delivery via its fleet of around 100 vehicles.

All the gates are bespoke made to order and can be supplied with matching fencing, pedestrian gates and a wide range of additional access control options.
