Introducing Bambura® Fencing & Gates

First Fence's innovative Wood Plastic Composite fencing and decking range has been expertly crafted using a precise blend of bamboo and other wood fibres, which is then extruded with an HDPE recycled plastic casing and various additives such as UV stabilisers, colourants, and bonding agents.

These components are thoroughly blended to ensure a homogeneous mixture, providing the UK with a market-leading board in terms of quality, longevity, and price. All fencing and gates are available with either silver or black aluminium hardware. Making your own gate? No problem — we have the boards to suit.

Introducing Bambura® Decking

First Fence's cutting-edge Wood Plastic Composite fencing and decking collection is manufactured using a carefully balanced mix of bamboo and other wood fibres, combined with an HDPE recycled plastic outer layer and enhanced with UV stabilisers, colour pigments, and bonding additives. The result is a consistent, high-performance material available in both first-generation extruded boards and advanced second-generation co-extruded boards. This range provides durable, attractive, and budget-friendly decking solutions, all readily available from stock.
