

Press Release

Car Park Swing Barriers

First Fence launches a range of eight new car park swing barrier gates to its product line-up.

In busy commercial and private parking environments, the balance between robust vehicle security and efficient traffic management is delicate. Our new Car Park Swing Barriers provide the perfect solution, combining heavy-duty physical protection with effortless, controlled access for authorized vehicles.

Enhance site security without compromising on smooth vehicular flow. Our new range of commercial-grade swing barriers is designed specifically for car parks, industrial estates, and restricted access roads where durability and definitive boundary control are paramount.

Every barrier in this comprehensive new eight-kit range is engineered for smooth operation and long-term endurance, making it perfect for office complexes, retail parks, and industrial sites that require dependable traffic management.

Available Sizes & Configurations

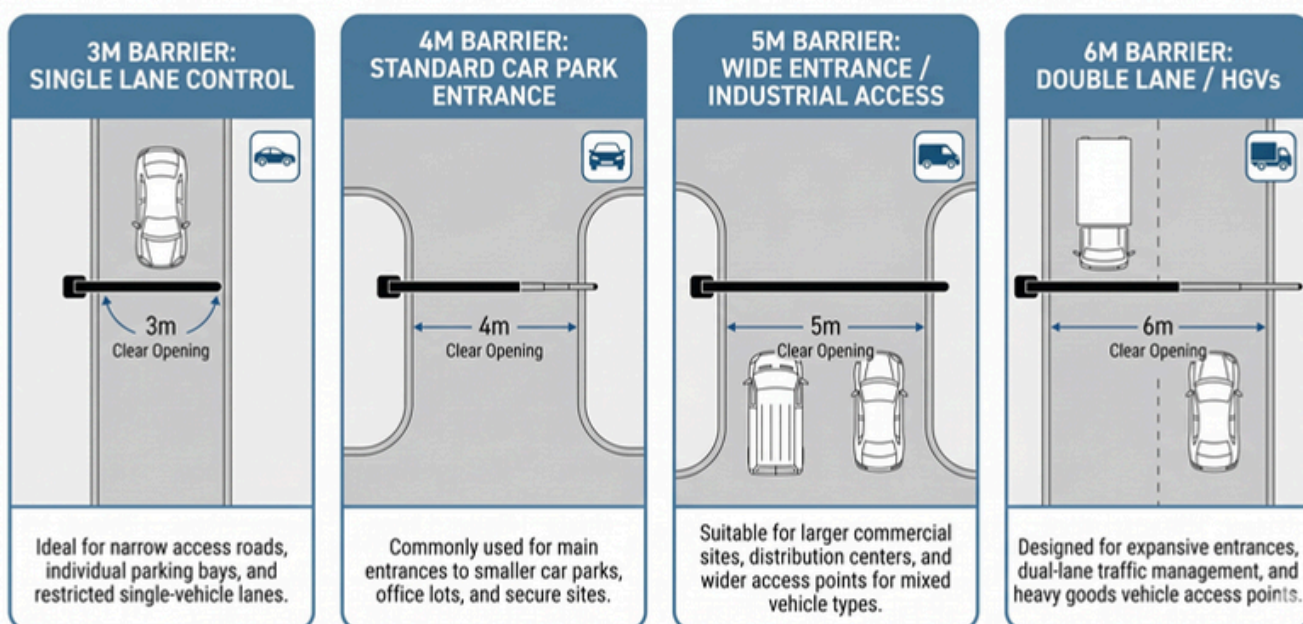

We offer eight distinct barrier kits across two main configurations, all featuring the same high build quality and heavy-duty specification to perfectly bridge the required span.

Maximum Security Double Barrier Kits designed to totally stop all traffic flow and prevent unauthorized access underneath the main arm. These four kits feature a double lower leaf barrier design for ultimate physical deterrence.

- **3m Double Leaf Swing Barrier:** A fixed-length double barrier for standard single-lane control.
- **4m Double Leaf Swing Barrier:** Features our innovative telescopic bar attachment, utilizing the 3m leaf with a seamless 1m extension for wider lanes.
- **5m Double Leaf Swing Barrier:** A fixed-length double barrier for wide commercial entrances.
- **6m Double Leaf Swing Barrier:** Maximizes entrance control by utilising the 5m leaf paired with a telescopic extension to cover expansive openings.

Standard Single Bar Kits Offering a streamlined, highly visible approach for straightforward traffic management, these four kits feature just the top swing barrier bar without the double lower leaf. They provide classic, effective access control and are available in the exact same versatile widths:

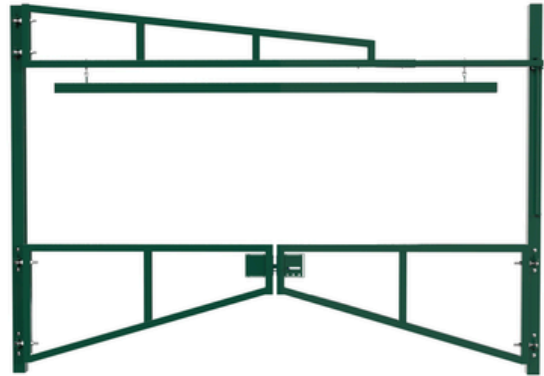

- **3m Swing Arm Only Barrier:** Timeless, clean boundary control for standard lanes.
- **4m Swing Arm Only Barrier:** Utilises the 3m leaf with our telescopic bar attachment.
- **5m Swing Arm Only Barrier:** Wide-span control with a clean, professional aesthetic.
- **6m Swing Arm Only Barrier:** Our widest single-bar option, using the 5m leaf and a telescopic extension for maximum coverage.
