Understanding Multi Use Games Areas:

What are they?

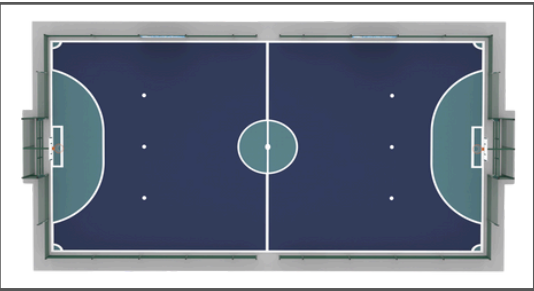

- Scope:** This range has been developed to support a wide variety of sports and activities within a single, high-performance space, ideal for schools, parks, housing developments, and community centres.
- Purpose:** To inspire healthier, more active lifestyles by providing safe, inclusive environments where people of all ages and abilities can come together to play, train, and connect.
- Intention:** To deliver long-lasting, space-efficient outdoor solutions that maximise community use and encourage year-round participation in sport and recreation.
- SAPCA Compliant:** Rebound mesh panels at a minimum height of 3.0 metres is a recommendation in the 'SAPCA Code of Practice for the Construction of Outdoor Multi Use Games Areas'.

How Does This Influence Design?

- Multi-sport Compatibility:** The system is designed with adaptable layouts, markings, and goal units to support a wide variety of sports—including football, basketball, tennis, and hockey—within a single enclosed space.
- Inclusive Access:** Entrances, surfacing options, and equipment have been designed to ensure usability by all age groups and abilities, with particular attention given to step-free access and wheelchair-friendly zones.
- Durability for High Traffic Use:** Materials and finishes have been selected to withstand frequent use and weather exposure, ensuring long-term performance in schoolyards, public parks, and urban developments.
- Safety and Visibility:** Fencing, rebound panels, and corner treatments have been developed to minimise injury risks and maintain clear visibility for both users and supervisors, enhancing safety without restricting play.
- Compact and Efficient Layouts:** Each unit is modular and space-conscious, maximising the use of limited land while ensuring that different sports can be played simultaneously or in rotation.
- Low Maintenance Requirements:** Finishes, coatings, and structural details are chosen to reduce upkeep, helping local authorities and schools manage long-term maintenance with minimal cost or disruption.

Four Versions, One Supplier

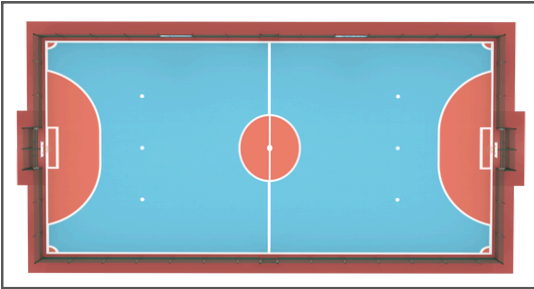

Mini Kit 24m x 12.1m

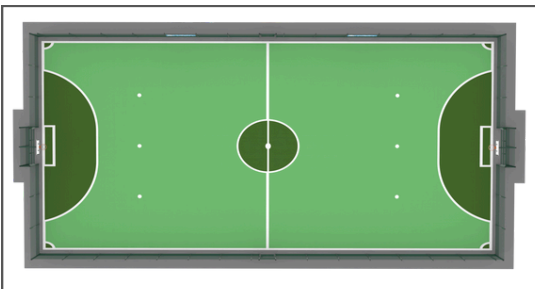

Goal Kit 8m x 4m

Secure 35 35m x 17m

Secure 38 38m x 18m

What Would MUGAs Be Useful For?

The 9 sports to play:

Football ✓

- Smooth, enclosed surfaces ensure safe, fast-paced games
- Markings tailored for small-pitch formats
- Great for school and community use year-round

Tennis ✓

- Full or half-court lines for recreational or training use
- Surface options available for bounce and grip control
- All-weather suitability supports regular play

Basketball ✓

- Full or half courts with fixed or adjustable hoops
- Cushioned, low-maintenance surfaces for safer play
- Accessible design caters to all age groups

Netball ✓

- Accurately marked goal posts, centre circle, and thirds
- Hard court surfaces ideal for drills and lessons
- Widely used in schools for structured PE sessions

Hockey ✓

- Synthetic or sand-dressed surfaces aid skill-building
- Compact layout suits drills and casual play
- Perfect for schools and community groups

Volleyball ✓

- Removable net systems for easy setup
- Adaptable surfaces make it a versatile option
- Popular in schools and clubs for flexible play

Badminton ✓

- Ideal in sheltered or enclosed MUGA spaces
- Portable nets and clear markings enable accurate play
- Best suited to indoor or wind-protected areas

Cricket ✓

- Polymeric or macadam surfaces support safe drills
- Enables consistent batting, bowling, and fielding sessions
- Reliable alternative to traditional grass nets

Handball ✓

- Fast, compact game suited to MUGA environments
- Shared lines with football/basketball for easy use
- Growing in popularity across schools and youth groups

Why MUGAs Are Ideal For Sports Use:

Multi-Sport Markings: Line markings in different colours allow several sports to be played on one surface without confusion, making the space truly multi-purpose.

All-Weather Surfaces: Durable materials like macadam, polymeric rubber, or synthetic turf ensure year-round use, with built-in drainage and slip resistance.

Efficient Use of Space: Ideal for schools and communities, MUGAs consolidate multiple sports into one compact area—saving space and reducing long-term costs.

Fencing for Safety: Secure perimeter fencing keeps play contained, enhances safety, and minimises disruption to surrounding areas.

Floodlighting Options: Optional lighting extends play into the evenings, supporting wider community access and after-school programmes.

Low Maintenance: Hard-wearing surfaces require minimal upkeep while standing up to heavy daily use, making them a practical long-term investment.
