First Fence Expands Modular Security Range with the Launch of Diamor[®] Chain Link Fencing Gates

SWADLINCOTE, UK – July 2026 — First Fence Ltd, a UK leading manufacturer and supplier of perimeter security and fencing systems, is proud to announce the launch of its new Diamor[®] Chain Link Fencing gate range. This strategic addition expands First Fence's comprehensive security portfolio, reinforcing its position as a complete one-stop shop for high-performance perimeter and access control solutions.

By introducing the Diamor[®] gate line, First Fence now offers customers robust, British-engineered access solutions designed specifically to integrate seamlessly with standard chain link systems for maximum durability and security.

Designed for Versatility and Fast Installation

As the latest addition to the First Fence modular gate lineup, Diamor[®] gates are engineered with field versatility in mind:

Universal Handing: Features no fixed left- or right-hand leaf, giving installers total control and flexibility on-site.

Upgradable Security: Pre-drilled frames fit the Unislide kit, allowing seamless upgrades to secure key access or digital code locks later.

Single Leaf Formats: Supplied in kit form (with supporting posts) ideal for pedestrian access, garden paths, and narrow walkways.

Double Leaf Formats: Designed for wide-clearance vehicular entry across driveways, commercial yards, and agricultural tracks.

Durable Finishes: Available in a dig-in format with galvanised, green powder-coated, or black powder-coated finishes, fully compatible with First Fence steel post chain link fencing kits.

About First Fence Ltd

First Fence Ltd is a nationwide manufacturer, hire specialist, and supplier of perimeter security, temporary fencing, and access control solutions across the UK.
