Timber Site Hoarding, Designed to Comply

Building Trust and Security with Certified Hoarding

Timber site hoarding is the public face of your construction project, instantly building trust. Its role is two-fold: providing a professional street appeal and acting as the primary defence for site safety. This includes protecting the public and workers from hazards, maintaining a secure perimeter, and preventing trespass. Choosing the right hoarding is vital for safety and managing your development's public image.

Compliance and Engineering Confidence

First Fence's timber hoarding is engineered to meet the highest industry safety standards, specifically aligning with TWf2012:01 "Hoardings - A Guide to Good Practice" (revised 2020). For maximum assurance, we offer an optional, site-specific engineer-backed Temporary Works Design. This service confirms the structure will meet all required safety, wind-loading, and stability standards for your location.

Options to Suit Most Sites

Timber Post Options (C24)

Standard Hoarding Post 150 x 150mm x 3.6m
Advanced Hoarding Post 100 x 200mm x 3.6m

Timber Hoarding Sheets (2.4m x 1.2m)

Plywood Sheeting (18mm Thick)
OSB Sheeting (18mm Thick)

Backstay Options

Add optional braces or
Kentledge blocks

Timber Horizontal Rails (C24)

Standard Hoarding Rail 75 x 75mm x 3.6m
Advanced Hoarding Rail 100 x 75mm x 3.6m

Horizontal & Vertical Infill Strips

Horizontal Infill Strips 150 x 22mm x 4.8m
Vertical Infill Strips 50 x 22mm x 2.4m

Complex Site Requirements?

Simply request our Temporary Works Design (TWD) service when ordering First Fence timber hoarding. This ensures you receive a personalised, engineer-backed plan for your site, verifying stability against extreme factors like crowd loading.

Temporary Works Design

Professional Engineering Calculations and Site-Specific Solutions

Do you require a Temporary Works Design?

Engineer issued TWD and advice for your specific site for only £749.99 per design

☐

PLEASE NOTE: One TWD is required for each product type

Colours. We Have That Too.

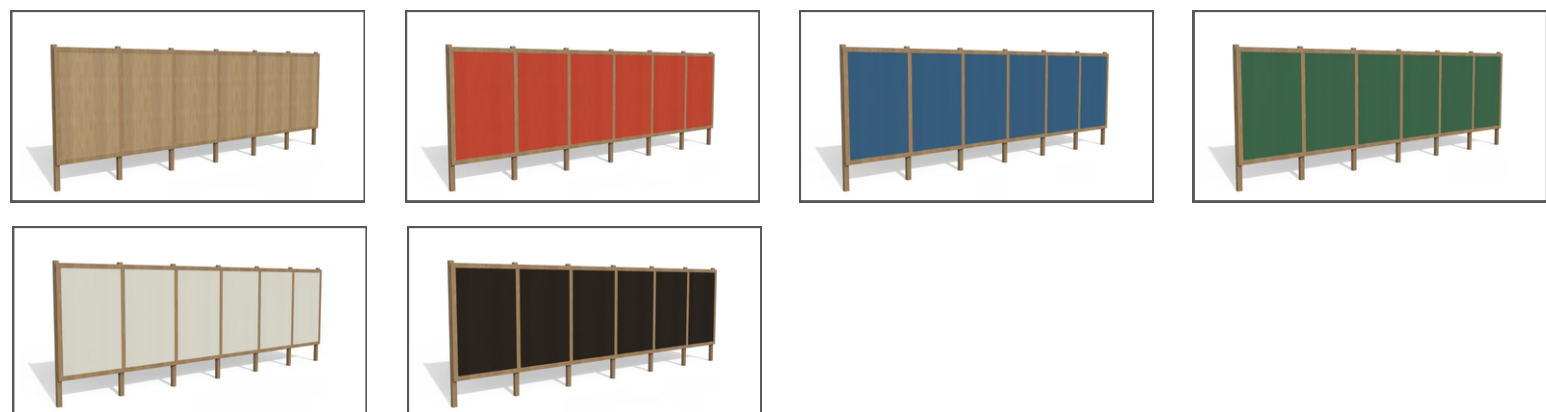

First Fence Colour Calculator

We believe buying timber hoarding should be simple, right down to colour selection. All First Fence timber hoarding is available unpainted, or with an optional board and infill colour coating. You can even choose different colours for the board and the infill panels to precisely match your brand's presence.

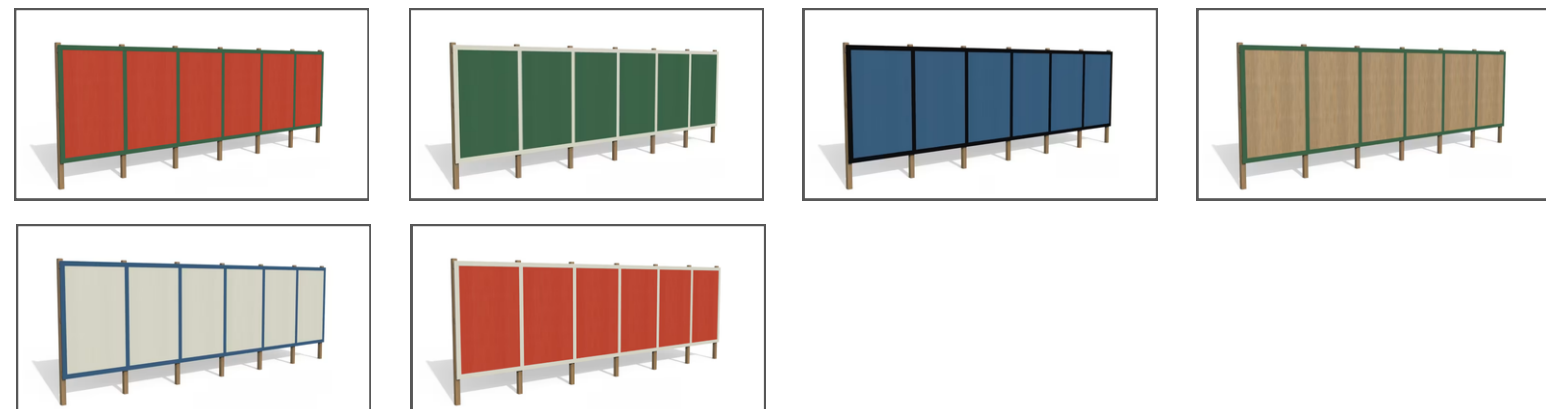

Custom Infill Strips Colour Selection

Custom Board Colour Selection

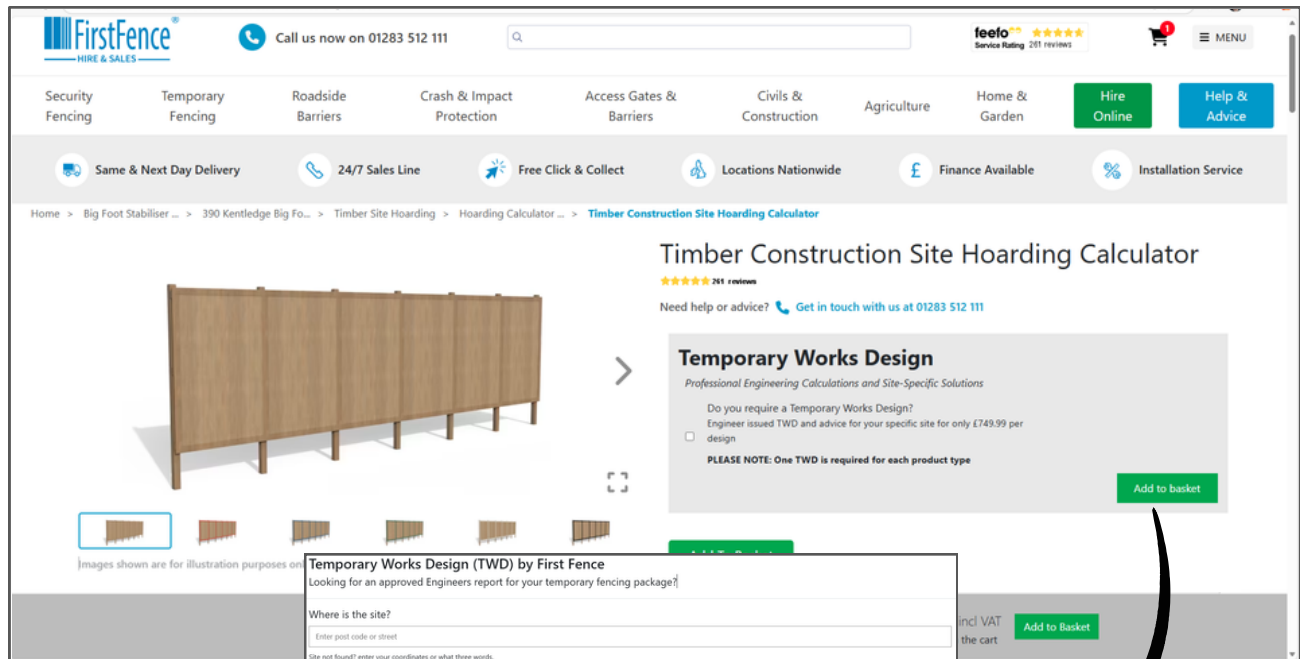

Shake it Up, With a Single Click

Safety. We Have That Covered.

Temporary Works Design (TWD)

Eliminate the guesswork and the risk of incorrect specification when buying hoarding. First Fence offers a simple, effective Temporary Works Design (TWD) calculator. We provide a site-specific, bespoke plan within a 48-hour turnaround, including expert recommendations on wind loading, notional horizontal loading, and crowd loading. Let First Fence handle the safety engineering, so you can focus on the development.

Step One

Tell us your site location with either an address, post code or coordinates.

Step Two

How long do you plan to have the hoarding installed? This effects the design over time.

Step Three

Tell us your desired posts, rails and sheets, and we'll design the hoarding to suit.

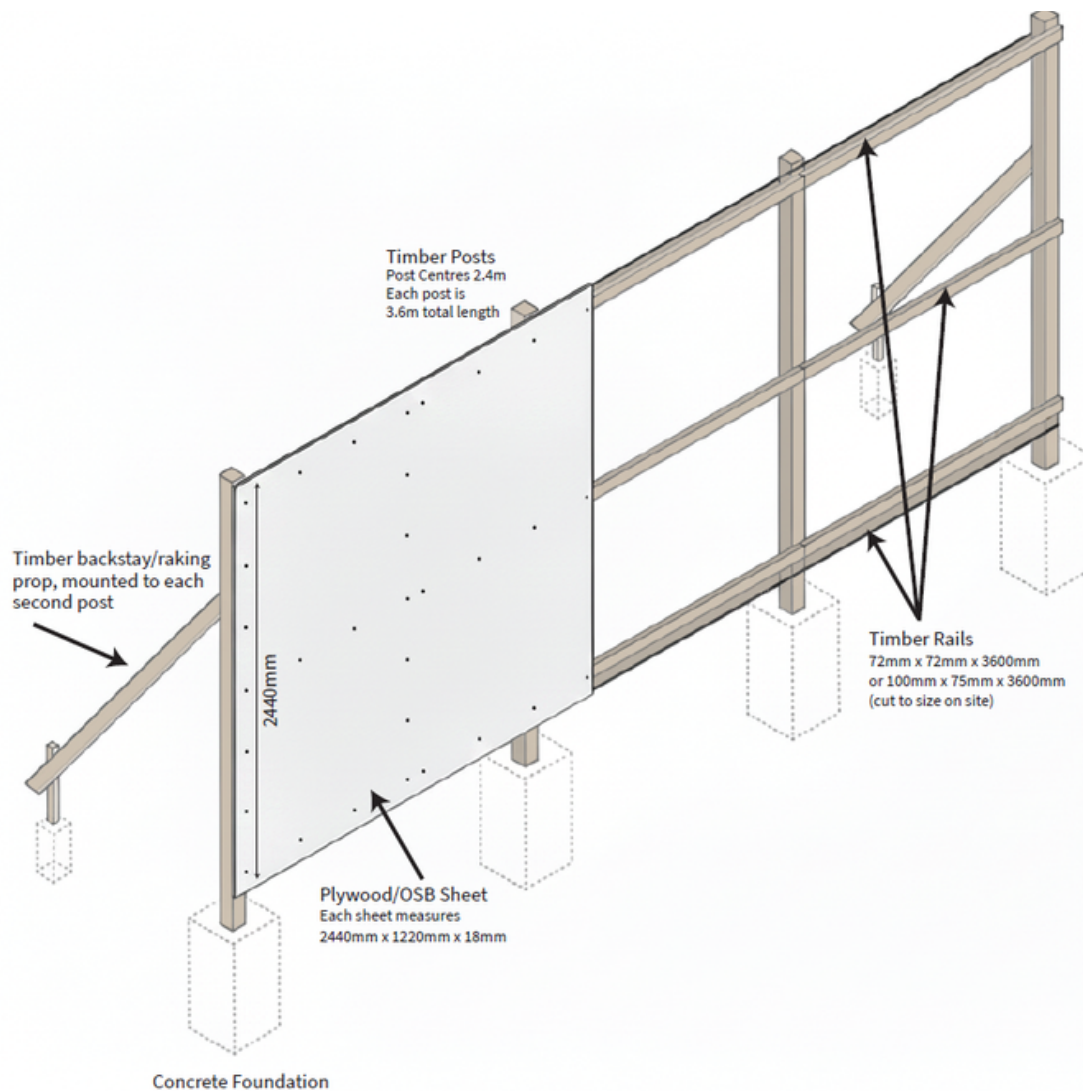

And that's It!

Example TWD:

Naked Timber Hoarding View

Not every timber hoarding system is the same, however the principle of posts, rails and infill sheets remains the same:

Available Products

Plywood Sheet -	2440mm x 1220mm x 18mm
OSB Sheet	2440mm x 1220mm x 18mm
Hoarding Post	150mm x 100mm x 3600mm or 100mm x 200mm x 3600mm
Timber Rail	72mm x 72mm x 3600mm or 100mm x 75mm x 3600mm
Horizontal Infill	150mm x 22mm x 4800mm
Vertical Infill	50mm x 22mm x 2400mm
