New is the 1m Pyramid Barrier. This road traffic separator is unique in that way that it rotates a full 90 degrees to enable contractors to 'box off' projects giving added security. The Pyramid barrier comes in standard Red and White but can be produced on corporate colours at no extra cost. Weighing only 5kg when empty and 55kg when full, the Pyramid Barrier is the No1 choice for cost and effectiveness. Stackability is no issue and links with most of the existing barriers available on the market.
