Secure Access, Uncompromising Protection!

Our Steel Hoarding Gates provide a blend of high-security access control and robust perimeter defence, engineered to protect personnel, vehicles, and temporary works sites in even the most demanding environments. Featuring heavy-duty, lockable designs that integrate effortlessly into 2.0m and 2.4m steel hoarding systems, these gates deliver a continuous, tamper-resistant boundary while ensuring controlled entry—making them the ultimate site security solution for construction zones, temporary storage yards, and public event venues.

Engineered from galvanised steel with optional powder-coated finishes, these modular gates combine superior corrosion resistance with long-lasting structural strength. Available in double-leaf vehicle configurations, stand-alone pedestrian options, and space-saving internal access door panels (measuring 2.1m wide), they offer flexible, fast-installation access points without compromising site safety. Built for durability and full perimeter alignment, our Steel Hoarding Gates are the trusted choice for safe, efficient, and fully enclosed boundary protection.

Key Features

- ✓ **Robust Steel Construction**
(Made from galvanised steel with optional powder coating)
- ✓ **Seamless System Integration**
(Designed to work with 2.0m and 2.4m steel hoarding panels)
- ✓ **Versatile Access Configurations**
(Available in double-leaf vehicle, standalone pedestrian or internal access door panels)
- ✓ **Lockable & Tamper Resistant**
(Chains & padlocks reduce risk of theft or unauthorised entry)
- ✓ **Fast & Flexible Installation**
(Designed for rapid deployment, integrating into existing fencing lines)

Suitable For

- ✓ Construction & Building Sites
- ✓ Temporary Storage & Material Yards
- ✓ Open-Air Events & Festivals
- ✓ Infrastructure & Roadwork Zones
- ✓ Demolition & Commercial Renovation Sites
