Shape-Retaining Resilience, High-Visibility Defence!

Our column protectors combine the robust shock-absorbing capacity of flexible design with a bright, high-visibility yellow finish. Designed to fit perfectly into busy car parks, factories, and warehouse yards, they provide a heavy-duty, reliable defence against repeated vehicle impacts without compromising their original shape or structural reliability.

Weighing a substantial 27kg, these protectors deliver ultimate impact resistance and seamless installation. As a vital shield for your supporting infrastructure, these high-visibility units provide an uncompromising line of defence in high-risk environments. Available in versatile S200 and S300 models to accommodate both narrow and wide posts, each protector is fitted using a secure hook-and-loop webbing fastener for rapid deployment and a firm, unshakeable hold during collisions.

Key Features

- ✓ **Shape-Retaining Impact Absorption**
(Designed to return to original shape after impact)
- ✓ **High-Visibility Yellow Finish**
(Brightly coloured to maximise awareness of hazards)
- ✓ **Substantial Heavy-Duty Build**
(Weighing a solid 27kg for heavy-duty resistance)
- ✓ **Versatile Post Compatibility**
(Available in S200 (narrower posts) and S300 (wider columns))
- ✓ **Rapid, Secure Installation**
(Fitted with robust hook-and-loop fastening system)

Suitable For

- ✓ Warehouses & Distribution Centres
- ✓ Multi-Storey & Surface Car Parks
- ✓ Loading Bays & Delivery Depots
- ✓ Manufacturing Facilities & Factories
- ✓ Commercial Yards & Industrial Estates
