Chapter 8 Pedestrian Barriers

Specification Sheet

SPC-CHAPTER8-002A

Fully Compliant Traffic Management & Pedestrian Safety

Designed for maximum visibility and robust performance, our Chapter 8 Pedestrian Barriers deliver superior public protection and clear routing for roadworks, construction zones, active highways, and large-scale events. Manufactured from high-quality, impact-resistant plastic, these highly visible barriers offer a reliable safety system that easily withstands harsh weather conditions and frequent outdoor handling.

Designed to be lightweight for single-person handling, rapid deployment, and easy transportation, our modular, quick-to-assemble systems provide customiSable stability through standard or anti-trip feet options, easily adapting to your site's dynamic temporary safety requirements and varying foot traffic volumes.

Key Features

- Fully Chapter 8 Compliant
  (Meets UK legal requirements for traffic management on public highways)
- Robust & Weatherproof Construction
  (Made from impact resistant plastic designed for harsh outdoor settings)
- Lightweight & Interlocking Design
  (Optimised for single-person handling with interlocking clips)
- Adaptable Stability Options
  (Available with interchangeable standard or anti-trip feet to maximise safety)
- High-Visibility Performance
  (Designed with bright, high-contrast colours to ensure clear routing)

Suitable For

- Roadworks & Highway Maintenance
- Festivals & Large-Scale Events
- Construction & Building Sites
- Car Parks & Transport Hubs
- Schools & Retail Environments

Avalon Pedestrian Barriers

Avalon Plastic Pedestrian Barrier 1m

Height:	1000mm
Length:	1000mm

Bull Barriers

Bull Barrier Complete Modular System

With its ultra-lightweight construction and curved, deflective profile, the Bull Barrier is an efficient solution for modern traffic management.

Its intuitive hinge-and-slot design requires minimal components, enabling rapid, deployment even across long barrier runs, narrow streets, or winding road layouts.

Purpose-built to mitigate collision risks, the barrier safely redirects vehicles and maintains a secure perimeter for both workforces and pedestrians.

High-contrast red and white sections ensure maximum visibility, serving as a clear early warning system on motorways, urban roads, and temporary work sites.

Fully certified for impact performance, the Bull Barrier delivers an uncompromising combination of robust safety, swift installation, and exceptional site adaptability.

Crash Tested to 50mph Lightweight Wind Stable up to 54mph Modular & Colour-Coded

Bull Barrier Heavy Duty Separation Barriers

- Crash-tested to 50mph (T2 W6 classification) for critical vehicle impact scenarios.
- Wind-tested up to 54mph to ensure resilience in exposed, high-wind roadwork zones.
- Curved steel design deflects oncoming traffic safely back toward road lanes.
- Only 46kg per unit—enables fast, 2-person installation with minimal equipment.
- Colour-coded sections support visual guidance and improved night visibility.
- Pre-galvanised steel plate with polyester powder coating.
