Installation Guide

**FirstFence**

Standard Railings

Follow our installation guide below to erect your railing system.

Step 1
Dig-In Posts

Dig the foundation holes for the posts. Ensure the holes are spaced a bay width apart. Now the posts can be set into the foundation holes.

Step 1
Bolt Down Posts

Fix your Bolt Down Posts to the ground using the appropriate Through Bolts.*

Please note that the installer is responsible for choosing the right type of Through Bolts for Bolt Down Posts.

Step 2

The Bay is now attached using Fishplates and Posts.

First Fence

Step 3

Check that your bolts are correctly tightened and your railings are now ready.
