

The external corner is designed to enable usage around corners without the need for breaks within your impact barrier system. In comparison to the traditional steel corners, this plastic corner promotes a much more striking appearance. Therefore, raising awareness of the surroundings with standout diamond grade reflectors situated in the polymer corners.

The corners not only aid the prevention of vehicle incidents but also protect individuals from the rough edges on the galvanised steel edges on the barriers themselves. The rounded profiles are designed to be durable and withstand impact but also reduce the risk of damage to the vehicles involved by deflecting vehicles upon collision.

Specification	Height	Color(s)	Material	Weight
HDPE Armco 90 Degree External Corners with Diamond Grade Reflectors	320mm to suit 310mm x 85mm Armco Rail	Yellow & Black	HDPE (High Density Polyethylene)	1kg
