

Key Features

- ✓ **Pre-Galvanised Steel to BS 10346**
(Ensures compliance with latest standards)
- ✓ **Choice of Post Style**
(Dig In or Bolt Down available)
- ✓ **Safety**
(Rolled safety edges)
- ✓ **Durability & Easy Installation**
(Resistant to corrosion and weathering, ideal for outdoor use)
- ✓ **Aesthetic Appearance**
(The smooth lines give an aesthetically pleasing look)

Suitable For

- ✓ Schools and Nurseries
- ✓ Play Areas
- ✓ Commercial Sites
- ✓ Sports Facilities
- ✓ Pedestrian & Passenger Demarcation

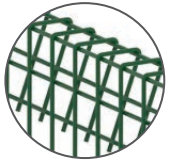

Complies with BS 10346

This is the key standard for pre-galvanised steel products.

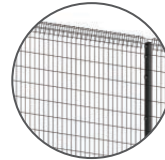

Excellent Durability

The mesh is manufactured from pre-galvanised steel and polyester powder coated. This dual layer of protection provides resistance to rust, corrosion and weathering ensuring a long, low-maintenance lifespan.

Safety

Rolled safety edges are the product's defining feature. The top and bottom edges of the mesh panel are rolled over creating a smooth, closed-beam section. This design eliminates any sharp or spiky wire edges, making it safe to touch and reducing the risk of injury.

Aesthetic Appearance

The smooth lines and user-friendly design combined with a choice of powder coated finish make this an aesthetically pleasing solution that can blend well into its environment.
