Impenetrable Access, Commanding Authority!

Redefine your site's entry points and achieve the perfect synergy of controlled access and absolute peace of mind with our Steel Palisade Gates. Designed for the developer or security professional who demands a proactive, unyielding checkpoint, our engineered gate systems serve as the premier gateway of an impenetrable perimeter.

Whether you are safeguarding a high-traffic industrial complex, a critical utility hub, or a commercial logistics terminal, our single and double-leaf gate systems are built to transform essential access points into defiant, high-security portals.

Key Features

- ⊙ **Intimidating Visual Deterrence**
(Aggressive tops designed to be psychologically & physically off-putting)
- ⊙ **Integrated Dual-Point Locking & Ground Security**
(Sliding latch system and drop bolts for secure locking)
- ⊙ **High Impact Resistance**
(Cold-rolled steel pales offer structural rigidity)
- ⊙ **Tamper-Proof Fastenings**
(Shear nuts cannot be undone with standard hand tools)
- ⊙ **Flexible Installation Formats**
(Dig-In and Bolt-Down formats accommodate any ground profile)

Suitable For

- ⊙ Critical Infrastructure & Utility Sites
- ⊙ Industrial Estates & Warehousing
- ⊙ Transport & Logistics Hubs
- ⊙ Data Centres & R&D Facilities
- ⊙ Educational & Public Sector Assets

Pale Profiles

Triple Point pales represent the height of high-security deterrence; the three-pronged crown is splayed to create a jagged, multi-directional barrier that makes scaling nearly impossible without specialised equipment.

Single Point pales are ideal for environments requiring a balance of security and a slightly more streamlined silhouette. They offer a focused, vertical deterrent that remains highly effective against climbing while maintaining a clean, uniform aesthetic.

Round and Notched pales are ideal for public-facing lower-risk perimeters; offering a formidable visual boundary while mitigating the risk of accidental injury, meeting safety needs without sacrificing the structural integrity of the steel.

Security vs. Safety Performance Matrix

Pale Head Type	Security Rating	Safety Profile	Primary Recommendation
Triple Point	High	Sharp/High Risk	Critical infrastructure and high-threat zones
Single Point	Medium-High	Pointed/Moderate Risk	Industrial boundaries and high-value storage
Round & Notched	Medium	Blunted/Low Risk	Schools, retail parks and public-access areas

Palisade Fencing Gates Kits

Our palisade gate kits are designed to provide a comprehensive, ready-to-deploy solution for any perimeter access requirement. Our kits are available in a wide range of heights, from 1.8m, 2.0m and 2.1m security heights, up to maximum security 2.4m and 3.0m barriers.

Each kit is offered in a classic galvanised finish (BS EN ISO 1461) for superior rust resistance and durability, or a polyester powder-coated version for a sleek professional appearance that can be matched to your corporate branding or surrounding landscape. The kits are available as a dig-in or bolt-down option and require assembly on site.

Palisade Gate Kit Contents

Hinge Post & Catch Post (single leaf)
Hinge Posts (double leaf)
Gate Leaf (1 or 2 depending on gate type)
Adjustable Gate Eyes
Ribbed Inserts
W Section Pales
Bolt Pack (M8 Nuts & Bolts)
Drop Bolt

Each kit includes two posts and either single or double gate leaves, complete with a matching sliding latch system.

The quantity of other hardware and components differs depending on the chosen system height.

Please Note: The gate comes as components and it requires on-site assembly.
