Durable Perimeter Protection, Precision Parking Control!

Our Wheel Stop Systems deliver reliable vehicle positioning and high-visibility perimeter defence, designed to integrate with commercial car parks, warehouse loading bays, and designated parking zones.

Constructed from high-grade, UK-manufactured materials, these permanent wheel stops offer a resilient, cost-effective alternative to traditional steel barriers that will never require repainting. They serve as a reliable physical indicator to prevent cars, lorries, and heavy transport from overhanging into unauthorised spaces, hitting perimeter walls, or impacting adjacent vehicles in high-exposure industrial and commercial environments.

Precision-built for long-term field performance, each anchor-fixed unit provides essential guidance for reversing drivers, protecting site infrastructure, securing pedestrian pathways, and withstanding continuous heavy-vehicle alignment.

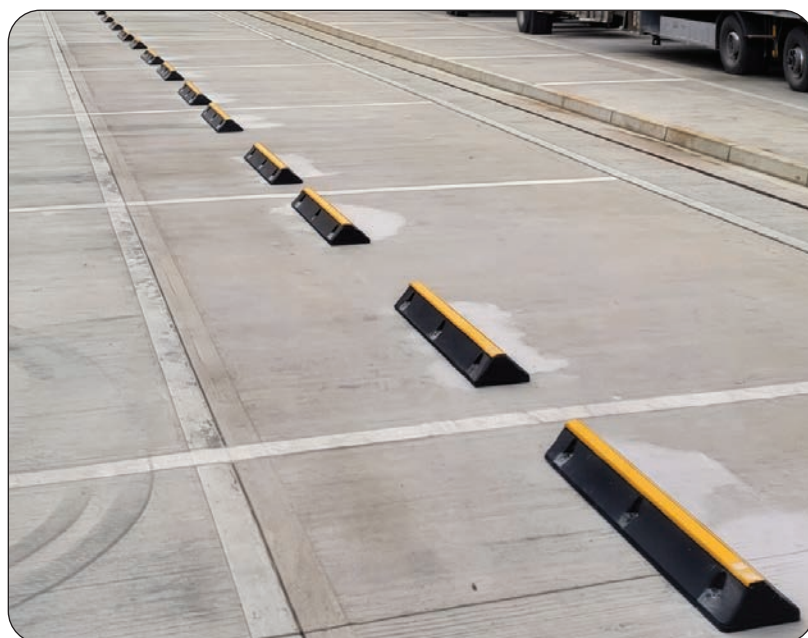

Available in **Domestic**, **Commercial**, **HLGV**, and **HGV** formats, these wheel stops have pre-drilled holes for ground installation.

Key Features

- ✓ **UK-manufactured Durability**
(Made from high-grade materials for long-lasting impact resistance)
- ✓ **Vehicle Specific Range**
(Available in Domestic, Commercial, HLGV and HGV formats)
- ✓ **Infrastructure & Perimeter Protection**
(A solid physical barriers to prevent parking overhanging and wall impacts)
- ✓ **Permanent Ground Anchoring**
(Designed for fixed installation using heavy-duty floor anchors)
- ✓ **Zero-Maintenance Design**
(Eliminates labour and upkeep costs, a cost-effective alternative to steel stops)

Suitable For

- ✓ Warehouse Lorry & Loading Bays
- ✓ Commercial Car Parks
- ✓ Industrial & Logistics Facilities
- ✓ Domestic & Residential Driveways
- ✓ EV Charging & Pedestrian Zones
