Uncompromising Protection, Discreet Defence!

Our ProFence® Mesh Posts provide a formidable and highly dependable foundation for certified high-security perimeters. Engineered to withstand targeted intrusion attempts and demanding environmental conditions, our range includes both high-performance Dig-In and Bolt-Down posts, delivering a reliable first line of defence against forced entry while maintaining a sleek, modern appearance that blends perfectly into sensitive surroundings.

This specification covers our comprehensive ProFence® SR1 (A1) Post range, available in Corner and Intermediate configurations to accommodate both 868 Twin Mesh and 358 Prison Mesh fencing. Designed for LPS 1175 SR1 (A1) certified compatibility and straightforward installation across various ground types, these posts deliver a flawless, secure fit that ensures the long-term safety, optimal CCTV visibility, and operational integrity of your high-security perimeter defences.

Key Features

- ✓ **Certified LPS 1175 SR1 (A1) Rating**
(Rigorously tested to withstand a one-minute forced entry attack)
- ✓ **Versatile Post Configurations**
(Dig-In and Bolt-Down options & corner profiles for continuous secure alignment)
- ✓ **Optimised for Surveillance**
(High-visibility design ensures no blind spots for CCTV monitoring)
- ✓ **Dual Mesh Compatibility**
(Designed to work with both 868 Twin Mesh and 358 Prison Mesh panels)
- ✓ **Complete System Integration**
(A tamper-resistant kit that accommodates heavy-duty accessories)

Suitable For

- ✓ Government and Military Facilities
- ✓ Airports and Transport Hubs
- ✓ Prisons and Correctional Facilities
- ✓ Commercial and Industrial Sites
- ✓ Schools, Colleges and Campuses

The ProFence® intermediate post (also used as an end post) is available in 1.8m, 2.0m, 2.4m and 3.0m heights and is designed to work with the ProFence® system.

A corner post is available to configure directional changes.

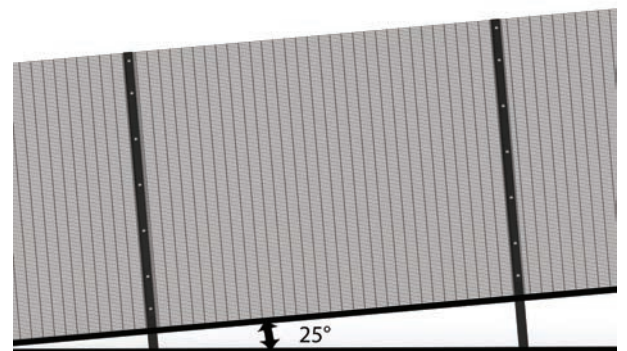

Available in both Dig-In and Bolt-Down formats.

Intermediate Posts have through holes on one face, Corner Posts have holes on two faces.

The posts feature a clamp bar fixing method which securely locks the mesh panels to the posts, eliminating pry points and upholding the LPS 1175 certification.

ProFence® fencing kits are approved for gradients up to 25°. Available in 868 or 358 mesh profiles.

Certified SR1 (A1) Security Rating

Rigorously tested against a one-minute attack using Tool kit A (including small, concealable hand tools such as pliers, bolt cutters and engineer's hooks).

This provides a minimum 60-second delay, giving on-site security teams crucial time to detect and respond.

Delivers certified protection without the aggressive appearance of traditional palisade fencing.
