- ⊙ **Residential**
- ⊙ **Shared Office Spaces**
- ⊙ **Gates and Doors**
- ⊙ **Rental Properties**

Hard Wearing

Crafted from 316 Marine Grade Stainless Steel, which is highly resistant to the effects of corrosion making it ideal for most locations including coastal or marine regions.

Quick Installation

Simple to install with the rawl plugs and screws provided. Each intercom comes with a 12-volt amp.

Easy to Manage

Each intercom is configured and managed via an app. SIM card required.

Gate and Door Compatible

Compatible with automatic sliding and bi-folding gates.

Comelit GSM Intercoms

The Comelit range is designed to work with gates, barriers and door entry and is suitable for small offices or residential properties. Install a SIM card from any network in the panel, then configure it with the app. Avoid missing callers or important deliveries!

Telguard Intercoms

Ideal for remote or temporary sites, distribution centres, retail parks, rental properties, gates and barriers, car parks, and event barriers. The built-in time clock allows you to divert the call button out of hours or even disable it during unsociable hours. Some products are available in a choice of stainless steel or anthracite finish.

Videx Intercoms

These are simple to install intercoms that are suitable for residential or commercial properties with one entrance. Using mobile phone technology, a call is made to the occupant's phone when a visitor calls, therefore removing the need to be on site to answer the door or gate. Available with or without a keypad and an optional rain shield.
