Uncompromised Structural Security!

Our high-performance Scaffolding Fixings deliver exceptional connection strength and multi-angle versatility, engineered to build rock-solid working platforms for high-reach construction, structural repair, and site maintenance tasks.

Manufactured from steel and finished with a rust-resistant zinc coating, these heavy-duty couplers, clips, and putlogs ensure maximum stability, rigidity, and load-bearing reliability across demanding site conditions. Designed for integration with standards, ledgers, and transoms—as well as steel hoarding panels—they provide robust, weather-resistant connections available individually or in bulk to power projects of any scale.

Key Features

- ✓ **Heavy-Duty Steel Construction**
(Steel provides excellent load-bearing capacity and structural integrity)
- ✓ **Corrosion-Resistant Finish**
(A protective zinc layer shields against rust, harsh weather and site wear)
- ✓ **Multi-Angle & Precise Structural Alignment**
(Includes versatile couplers for complex angles & precise 90° connections)
- ✓ **Enhanced Safety & Enclosure Safety**
(Hoarding clips and putlog couplers to integrate safety panels & reinforce platforms)
- ✓ **Universal Compatibility & Site Flexibility**
(Fully compatible with standard scaffold tubes, standards, ledgers & transoms)

Suitable For

- ✓ Elevated Working Platforms & Frameworks
- ✓ Complex & Obstacle-Navigating Scaffolds
- ✓ Perimeter Site Protection
- ✓ Under-Board Platform Reinforcement
- ✓ Facility Maintenance

Selecting The Right Fixings

- **Right-Angle Couplers:** Choose these primary load-bearing connections to secure horizontal ledgers or transoms to vertical standards at 90°, providing essential rigidity to the scaffold structure.
- **Swivel Couplers:** Opt for these multi-angle fittings when installing diagonal face bracing, accommodating irregular building contours, or navigating site obstacles where variable positioning is required.
- **Putlog Couplers (Single Couplers):** Use these non-load-bearing fixings specifically to support putlog or transom tubes beneath scaffold boards, stabilising the platform deck without carrying primary structural loads.
- **Hoarding & Scaffold Clips:** Select these specialised retainers when attaching external steel hoarding panels to the framework, establishing secure site perimeters and screen protection against debris or unauthorised access.
