Versatile Timber Sleepers, High-Impact Landscaping

Engineered for structural durability and effortless versatility, our Railway Sleeper collection provides a robust foundation for garden borders, raised flowerbeds, retaining walls, pathways, and custom outdoor furniture. Pressure-treated to BS EN 351-1 standards, this premium timber range resists rot, fungal decay, and harsh weather exposure—ensuring exceptional longevity while retaining its rich, natural aesthetic in either a classic green or warm brown finish.

Precision-cut to a standard 2400mm x 200mm x 100mm profile, these easily adaptable sleepers can be quickly tailored on-site to fit bespoke project layouts. Available as single units or in cost-effective bulk packs of 100, this sustainable timber solution offers landscape architects, contractors, and home gardeners an aesthetically refined, high-performance material to elevate both the form and function of any outdoor space.

Key Features

- Industry-Standard Pressure Treatment
(Treated to BS EN 351-1 standards to protect against rot and decay)
- Standardised Dimensions
(Cut to 2400mm x 200mm x 100mm for integration into various layouts)
- Versatile Adaptability
(Easily cut to custom length on-site to suit bespoke designs)

Additional Information

Important: Due to the size and weight of railway sleepers, manual handling requires a two-person lift. First Fence offers offloading services including:

First Fence Offload: Our team unloads the goods to the kerbside for you.

Assisted Offload: Our driver will be able to help you offload the item by hand to the kerbside.

A site contact must be available to receive goods and sign for the delivery. Prices may vary depending on the service required.

Often Bought With

Sleeper Retainer RSJ Posts

Vital components when building garden beds, retaining walls and other garden structures. Available in 1200mm, 1500mm, 1800mm and 2000mm lengths (127mm x 76mm).

Straight Sleeper Pin

Ideal for securing sleepers in retaining walls, raised flower beds and sleeper steps.

Made from pre-galvanised steel and with a length of 440mm, these pins can be driven into place using standard tools. Simply drive the pin into the ground where the sleeper will be placed and screw the bracket onto the timber sleepers.

Creosolve Wood Treatment

Maintain the lifespan of your timber with this quality wood treatment.

Available in a light brown and a dark brown option, it is ideal for rough exterior timber, but not suitable for decking or furniture.

Apply two coats to avoid patchiness in the finish.

Hammerite Metal Paint - Black

For exterior metal to extend the life expectancy and visual appeal.

Easy to apply with a brush, it is touch-dry after two hours and can be re-coated after four.

A primer may be needed especially for galvanised posts.

Hammerite Special Metals Primer

A water-based product designed to promote excellent adhesion of metal paint to stainless steel and non-ferrous metals, including galvanised, brass, chrome & copper.

Ideal for use with RSJs.

Paint Brush

When painting outdoor metal structures the 50mm synthetic paint brush is a versatile and efficient choice.

The moderate size of the brush head allows for detailed work.

The 100mm brush is ideal for larger coverage areas.

Brown Treated Railway Sleepers - Pack of 100

This bulk pack of 100 brown pressure-treated railway sleepers delivers exceptional structural strength and versatility for large-scale landscaping, including raised vegetable beds, retaining walls, step risers, pathways, and bespoke outdoor furniture.

Pressure-treated to BS EN 351-1 standards, this rich brown finish deepens the organic wood grain while offering robust protection against rot and environmental decay—a service life easily extended with periodic brush-on maintenance.

Easily cut to custom lengths on-site with standard hand or power saws, these adaptable sleepers can be laid directly onto prepared ground, set into trenches, or stacked and secured using structural timber screws or earth spikes to create clean, highly functional, and visually striking garden structures.

Green Treated Railway Sleepers - Pack of 100

This bulk pack of 100 green pressure-treated timber sleepers offers outstanding load-bearing stability and design flexibility for extensive outdoor developments, from terraced borders and soil-retaining barriers to walkway paving, steps, and heavy-duty garden seating.

Treated in full compliance with BS EN 351-1 guidelines, the subtle green finish highlights the natural timber grain while guarding the wood against fungal decay and weathering—a lifespan further maximised through routine surface care.

Simple to trim on-site using standard cutting tools, these highly workable beams can be anchored into sub-base trenches or stacked flush using heavy-duty landscape fixings to construct durable, seamlessly integrated features across any landscape layout.
