Maximum Perimeter Protection, High-Tensile Performance!

Our AntlerGuard® Deer Stock Fence delivers an unbeatable combination of height, high-tensile spring, and security, designed specifically for demanding deer management and livestock containment.

Made from galvanised woven steel wire, fully compliant with BS EN 10223-5 and BS EN 10244-2 standards, this netting provides an ultra-durable, corrosion-resistant barrier engineered to withstand intense antler pressure, heavy impacts, and extreme weather.

Engineered for rural and agricultural specifications, it offers an ideal boundary solution for estate management, agricultural land, forestry, and high-risk transport corridors.

Key Features

- ⊙ **High-Tensile Steel Core**
(Offer greater tensile strength to resist heavy animal pressure)
- ⊙ **Galvanised Corrosion Protection**
(Zinc coated to prevent rust and atmospheric corrosion)
- ⊙ **Engineered Knot Joints**
(Fixed knot joints give superior impact resistance and vertical strength)
- ⊙ **Versatile Gauge Options**
(Available as Light High-Tensile and Standard High-Tensile)
- ⊙ **190cm Height & Mesh Profile**
(Prevents smaller animals from entering and deer from jumping)

Suitable For

- ⊙ Forest & Woodland Regeneration
- ⊙ Farm Field & Agricultural Boundaries
- ⊙ Highway & Transport Safety Corridors
- ⊙ Rural Estate & Parkland Enclosures
- ⊙ Orchard, Crop & Commercial Nursery Security

Understanding Product Designations

How to read stock fence codes (Example: LHT13/190/15)

LHT	13	190	15
Gauge Category (Light High Tensile Wire)	Line Wires (13 Horizontal Wires)	Fence Height (190cm Height)	Vertical Spacing (15cm Stay Pitch)

Recommended Uses by Gauge

LIGHT DUTY
LHT Gauge

Thinner line wires. Keeps weight down, easier handling & cost-effective across large areas

BEST SUITED FOR:

- Low-stock pressure boundaries
- Infilling existing hedgerows and tree protection
- Garden and orchard perimeters
- Temporary stock containment

HEAVY DUTY
HT Gauge

Uses thicker wire gauges for high-density stock areas or high-impact boundary lines facing persistent herd pressure.

BEST SUITED FOR:

- Permanent perimeter fencing
- Long runs across uneven terrain
- General livestock containment

About Deer Stock Fencing

AntlerGuard® is tall, high tensile stock fence

Deer Stock Fencing stands at 1.9m high. This height is vital to prevent wild deer from leaping over.

It is designed to absorb high-level impact. Male deer exert high localised pressure when charging or thrashing antlers against a perimeter line.

PRODUCT CODE	SKU	HORIZ. WIRES	HEIGHT (cm)	STAY SPACING (cm)	WEIGHT KG	WIRE (mm)	JOINT TYPE
LHT13/190/15	AGRI-ANTLER-0020	13	190	15	45	2.0mm	Fixed Knot
HT13/190/15	AGRI-ANTLER-0040	13	190	15	70.4	2.5mm	Fixed Knot

Roll length: 100m

Material & Manufacturing Standards

Material Base	Zinc Coated Steel Wire
Manufacturing Standard	BS EN 10223-5:2012
Galvanising Standard	BS EN 10244-2:2023
Knot Style	Fixed Knot

Fixed Knot/Joint

Deer Fencing has fixed knot joints. A separate piece of high-tensile wire is wrapped around the horizontal and vertical wires, locking them together rigidly so the mesh won't slip, sag or lose shape under animal impact.

Often Purchased With:

Gripple Plus

A wire-joining and tensioning solution without the need for knots or complicated tools.

Bright Zinc Spray Can

Perfect for touching up any scuffs or scrapes to your galvanised finish products.

Agricultural Barbed Staples

First Fence's wire fencing barbed staples are designed for strong, reliable wire fixing in farm and rural fencing systems. Available in a 2.5kg box.

Agricultural Timber Posts

Essential for creating strong, stable fencing systems, our timber posts form a sturdy base for excellent pressure resistance.

Choose from end strainers, Intermediate strainers, and corner strainers in both tanalised UC4 and creosoted finishes.
