2. Refer to assembly instructions for proper orientation and installation sequence.
3. Ensure *Timber Posts* are plumb and securely anchored as required.
4. Regularly inspect structure during use, particularly after adverse weather conditions.

A disassembled Temporary Fencing Panel Coupler into two individual components, is used with the supplied timber screws to secure the panel to the timber post, the panel is clamped between the coupler halves and post.

The coupler can also be used to fix two adjacent panels to a shared timber post.
