FirstFence ®
HIRE & SALES

## Key Features

⊘ **Robust & Natural Construction**
(Strong Tanalised UC4 timber posts)

⊘ **Flexible Modular Design**
(Easily configured to suit different site layouts)

⊘ **Temporary but Secure**
(Designed for temporary use, remains stable and secure)

⊘ **Non-Invasive Installation**
(Avoids disturbing tree roots)

⊘ **Defined Area Control**
(Clearly shows the area of protection)

Suitable For

⊘ Construction Sites
⊘ Landscaping Projects
⊘ Infrastructure and Civil Engineering
⊘ Residential and Commercial Developments
⊘ Environmental and Ecological Conservation

Natural Construction
Built using strong, pressure treated timber posts for durability and a more aesthetic appearance suitable for sensitive sites.

Modular Design
Easily configured to suit different site layouts and tree locations. Can be adjusted or extended as project requirements evolve.

Temporary but Secure
Designed for temporary use during construction, the system is made to remain stable and secure throughout the project's lifespan. The components can be used across multiple sites, offering value for money.

Non-Invasive Installation
This system is designed to be installed into the ground using post drivers or similar equipment. This avoids the use of concrete and protects the roots of the trees.

Specification

System Height (Installed)	2000mm
Post Dimensions	8ft (2.4m) x 4"x4" or 10ft (3.0m) x 4"x4"
Recommended Post Dig In Depth:
