

Key Features

- **Durability and Strength**
(Resistant to rust, rot, fire and pests)
- **Cost-Effective**
(A budget-friendly solution compared to other fencing options)
- **Easy Installation and Repair**
(Quick to install and easy to repair if damaged)
- **Low Maintenance**
(Requires minimal upkeep)
- **Visibility and Security**
(Allows clear visibility while providing a secure boundary)

Suitable For

- Residential
- Commercial & Industrial
- Sports Enclosures
- Agricultural & Farm Use
- Public Spaces & Parks

Durability & Strength

Made from pre-cast concrete posts with galvanised or PVC coated chain link rolls, this system is resistant to rust, corrosion and weather conditions, ensuring long-lasting performance.

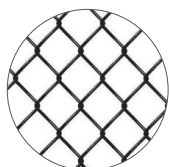

Cost-Effective

Compared to other options, it provides a budget-friendly solution without compromising security or durability.

Easy Installation & Repair

Lightweight yet sturdy, chain link fencing is quick to install and easy to repair, requiring only partial replacements rather than full panel replacements.

Visibility & Security

Unlike solid fencing, chain link allows for clear visibility while providing a secure boundary.

Specification - Concrete Posts

Post Type	Dig In
Height	0.9, 1.2, 1.5 & 1.8m (for 2.4m and 2.75m systems choose steel posts)
Material	Concrete

Specification - Chain Link Fencing Rolls

Height	0.9, 1.2, 1.5, 1.8, 2.4 and 2.75m
Length	25m (0.9, 1.2, 1.5, 1.8m), 12.5m (2.4 and 2.75m)
Material	Galvanised Steel Wire
Wire Gauge	Galvanised - 2.5mm, PVC Coated - 3.15/2.24mm
Colour	Galvanised, Green PVC Coating, Black PVC Coating
Comes With	Line Wire

Upsells

- F20 Hog Ring Clips Pack of 1000 (galvanised, green or black)
- Hog Ring Gun
- Rapid Set Post Mix

Chain Link Roll

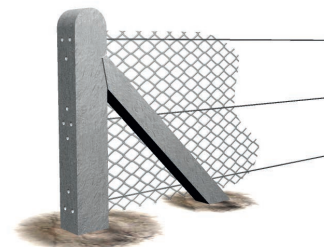

Material	Galvanised Steel Wire
Colour	Galvanised, Green or Black PVC Coated
Height	900mm, 1200mm, 1500mm, 1800mm, 2400mm & 2750mm
Roll Length	25m (0.9, 1.2, 1.5 & 1.8m) & 12.5m (2.4 & 2.75m) (Comes with line wire)
Wire Gauge (galvanised)	3.15/2.24mm
Wire Gauge (green/black PVC)	2.5mm

Concrete End Post Kits

Concrete End Post (to suit system height)	x1
Concrete Strut (to suit system height)	x1

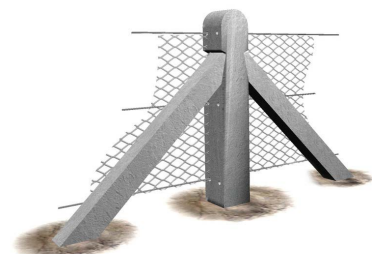

Fixings - Eyebolts, Galvanised Cleats, M8 x 25mm T Bolts and Nuts, Stretcher Bar to suit system height (fixing quantities vary depending on system height)

Concrete Two-Way Post Kits

Concrete Two-Way Post (to suit system height)	x1
Concrete Strut (to suit system height)	x2

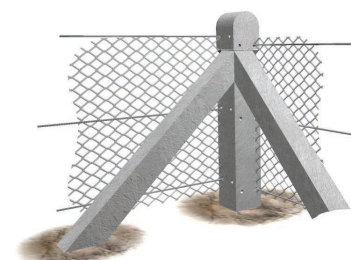

Fixings - Eyebolts, Galvanised Cleats, M8 x 25mm T Bolts and Nuts, Stretcher Bars to suit system height (fixing quantities vary depending on system height)

Concrete Corner Post Kits

Concrete Corner Post (to suit system height)	x1
Concrete Strut (to suit system height)	x2

Fixings - Eyebolts, Galvanised Cleats, M8 x 25mm T Bolts and Nuts, Stretcher Bars to suit system height (fixing quantities vary depending on system height)

Concrete Intermediate Post

Concrete Intermediate Post (to suit system height)	x1
