

Key Features

- ⊙ **Exceptional Durability**
(Waterproof and pest-proof)
- ⊙ **Extremely Low Maintenance**
(Once installed requires little upkeep)
- ⊙ **Eco-Friendly**
(Made from recycled plastic)
- ⊙ **Lightweight Yet Strong**
(Lighter than traditional timber)
- ⊙ **100% Recycled Plastic**
(Reduces landfill and use of virgin timber)

Suitable For

- ⊙ Decking Subframe
- ⊙ Raised Garden Beds
- ⊙ Fencing and Fence Posts
- ⊙ Retaining Wall
- ⊙ Compost Bins

Durability

Its stand out feature is its durability — fully waterproof, rot- and mould-resistant, immune to insects, and it won't warp, crack, or splinter from moisture or temperature changes.

Low Maintenance

Once installed, a plastic wood subframe does not need painting, staining, sealing or treating with preservatives.

Eco-Friendly

By utilising recycled materials, the demand for virgin timber is reduced, and plastic is diverted from landfills.

Customisable

Choose from an array of colours and finishes. Add a decorative infill for a truly personalised result.

System Specification

Square Profile	50mm x 50mm x 3900mm
Square Profile	100mm x 100mm x 3400mm
Batten	60mm x 30mm x 3900mm
Fascia	100mm x 25mm x 3400mm
Fence Rail/Joist	100mm x 50mm x 3400mm
Subframe/Joist	125mm x 50mm x 3400mm
Material	100% Recycled Plastic Wood
Colour	Black
Product Guarantee	Manufacturer offers a 10 year component guarantee, subject to fair wear and tear

This is 100% recycled waste plastic product so will expand and contract in the heat and cold; this can lead to a slight deformation of the product when not supported or connected at both ends, when stored before use. This can be minimised by keeping the product closely banded until the time the product is to be fitted.

Fixings: Use heavy-duty wood screws, e.g. 6 x 90mm yellow zinc wood screws (pilot holes drilled with a 5mm HSS drill bit). Where more strength is needed, use M8 cup square hex bolts (various lengths) to bolt profiles together, along with an M8 x 30mm repair washer and M8 nut and M8 dome nut.
