First Fence Residential Gates & Fences - in partnership with WIŚNIEWSKI.

Get to know WIŚNIEWSKI

See how we combine what's best for you and your home. For more than 35 years, we have been designing and manufacturing products meeting the highest standards of functionality and setting design trends. We combine safety with comfort, excellent design with a passion for technology, and manufacturing prowess with a love of detail. We know what a modern home needs and what challenges the household may face, because our products are present in millions of them. Spanning 270,000 m², our production hall currently manufactures thousands of garage doors, gates, windows, doors, and fences every day. At the same time, we are able to take care of individual expectations and provide support in construction or renovation processes. From windows and roller shutters, through garage doors and doors, to gates and fences

Get to know the WIŚNIEWSKI brand and the products trusted by millions of customers in over 35 countries. Enter the world of comfort and security, where we combine the best qualities

First Fence Residential Gates & Fences - in partnership with WIŚNIOWSKI.

What This Partnership Delivers To The UK

First Fence Ltd has been the official, premier UK Distributor for WIŚNIOWSKI commercial gates for almost 2 years, now we are bringing their fantastic range of residential gates and fencing systems to the UK market.

This strategic partnership brings together the UK's most reliable perimeter security supplier and Europe's foremost manufacturer of world-class automated and manual access control systems. For UK installers, developers, and homeowners, this means seamless access to unparalleled architectural design, cutting-edge smart technology, and precision-engineered security - all backed by First Fence's nationwide distribution, expert sales and technical support, and rapid delivery networks.

Why Choose WIŚNIOWSKI Residential Gates?

- **Architectural Diversity:** Over 90 distinct design models spanning premium stylistic collections, matching any architectural aesthetic from ultra-modern minimalist lines to timeless, ornate classic metalwork.
- **Smart Home Integration:** Fully compatible with advanced access control systems, GSM controllers, video intercoms, and smart-tech solutions for complete remote property management.
- **The MultiBox Innovation:** A revolutionary, multi-functional fence post that seamlessly integrates your mailbox, electronic code keypads, video intercoms, or fingerprint readers into one flush, aesthetically stunning enclosure.
- **Unrivalled Customisation:** Many of the designs can be customised with a wide variety of RAL colours, woodgrain infill finishes and laser-cutting details.
- **Full System Solutions:** With options available including cantilever and tracked sliding gates, single and double leaf swing and bi-fold gates as either automated or manual systems, plus pedestrian gates, an array of posts and matching fencing, this range can encompass your entire property and seriously increase your curb appeal.

First Fence Residential Gates & Fences - in partnership with WIŚNIEWSKI.

Enter the world of WIŚNIEWSKI gates

WIŚNIEWSKI residential systems are a complete solution for your home. Here you will find your dream designs, functional accessories, durable colours, the best materials and – most importantly – complete system-based solutions.

Why is this so important? The WIŚNIEWSKI range includes entrance gates, wickets, spans, posts, and mesh panels. Use all these elements to create a complete design for your home.

Explore the possibilities offered by WIŚNIEWSKI residential systems. Invest in a solution that will last for decades to come.

Solutions for
safety

Double protection

– the Duplex system

Steel is one of the basic structural materials in the construction industry. We take advantage of the physical and mechanical properties of high quality steel to obtain fence elements that are very stable and durable.

The manufacturing of WIŚNIEWSKI systems is based on the best materials and state-of-the-art technological lines. During the design phase, we use the finite element method (FEM), which allows us to understand how the product works in various conditions. To ensure the best weld quality, we use cutting edge welding technologies, obtaining repeatability of the products we make.

Certificates

What it means for you

Safety begins already at the production stage. Certainty that your product is made using the best materials ensures peace of mind when thinking about your home on a daily basis.

10 YEARS
warranty

Exceptional
durability

Corrosion protection

Duplex
system

WIŚNIEWSKI gates are manufactured using only the most durable of all materials – steel – and we process it by hot-dip galvanizing or coat painting using the DUPLEX system. The process is carefully controlled at each stage to ensure the highest attainable quality. We confirm this quality by providing ten year anti-corrosion warranty for steel fence elements.

System-based solutions

– a well-thought-out layout

MODERN AW.10.104

WIŚNIEWSKI residential systems stand for functionality, safety, unique design, and reliability that lasts. Choose from eight diverse model collections that make it easy to match the fence with the surroundings designed in any style.

Entrance gate

Railing

Part of a
complete system

All the elements are part of a system which, just like modules, can be freely arranged depending on your preferences or plot layout. The system includes: **double-leaf and sliding gates, wickets, segments, and posts.** You can choose the **multi-functional MultiBox post** with a built-in mailbox and electronic access control systems. Perfectly selected components ensure simple and quick installation, but above all, consistent style of the entire design.

The MultiBox and a pedestrian gate

Fence segment

Entrance gate types

Depending on the property layout and your preferences, you can choose a traditional double-leaf gate, a convenient sliding gate or a quick folding gate. The durable structure and reliable operation of the WIŚNIEWSKI entrance gates will guarantee safety and security for years to come.

Cantilever gates

What kind of property? A sliding gate needs more space on the sides of the entrance, which is why it will be perfect for properties with a wide front.

Single- and double-leaf gates

What kind of property? They don't need space on the sides, but take up more space between the entrance and the garage. This is why they are recommended for narrow, but relatively long driveways.

Bi-Folding gates

What kind of property? They combine the advantages of sliding and double-leaf gates. Thanks to their structure, they don't take up too much space. Perfect for narrow and short driveways.

Tracked Sliding gates

What kind of property? They do not require space in front of or behind the driveway, and thanks to the elimination of the "tail," they also require very little side space. Ideal for smaller properties and for those who appreciate unconventional solutions.

MultiBox – your private parcel pick-up station

MultiBox perfectly matches the entire WIŚNIEWSKI fence range.

Moreover, it can be customized with decorative motifs, such as the house number, decorative elements or initials, while soft LED lighting ensures comfort of use.

Compatible **with all**
gate models

Standard **with a**
door phone

Popular **parcel**

Drive unit integrated with the post

The AWSO 2018 drive unit integrated with the post is WIŚNIEWSKI's proprietary design that guarantees protection of the mechanism against weather conditions, damage, and theft. An automatic operating unit placed in a steel post of a sliding gate from WIŚNIEWSKI is the only such solution on the market.

Discover more details on the STYLE collection

Gabion systems

– exceptional aesthetics

CORROSION PROTECTION

Mesh panels and posts protected by galvanizing and powder coating

CUSTOMIZATION

The possibility to infill the gabion with different types of stones is one of the options for fence customization.

AESTHETICS

Gabion fences find a wide range of applications as fence elements for modern properties.

The gabion system is dedicated both for industrial and residential properties. It matches the surroundings exceptionally well and has an appealing design

Depending on the preferences, the gabion system can be built using 3 types of posts: the IPE 160 I-section or STM posts based on 50x100 or 50x120 [mm] closed box sections, and two types of flat panels – Vega 2D and Vega 2D Super. The gabion system by WIŚNIEWSKI ensures long-term reliability. The panels and posts are treated by hot-dip galvanizing or galvanizing and polyester coating, which effectively prevents corrosion processes. Additionally, special clips intended for joining the panels prevent deformation of the gabion system caused by the constant pressure of the stones. This allows us to ensure quality and reliability of the product.

Colours. Textures

Colour is the first feature our senses react to. We made sure that each of our customers can find the exact colour they are looking for. Our gates can be manufactured in RAL palette colours and the unique HOME INCLUSIVE colours – together with our range of textures and additional decorative elements, this gives you hundreds of options for a tailored solution.

Take advantage of the unique possibilities provided by the original, proprietary WIŚNIEWSKI brand palette: **HOME INCLUSIVE**. It includes over a dozen colours with a metallic finish and stunning 3D depth.

HOME INCLUSIVE COLOURS

Automation solutions for entrance gates

A properly selected gate is crucial when it comes to ensuring functional and reliable access to the property. Depending on the layout of the premises, a conventional double-leaf gate or a more comfortable sliding gate can be chosen. Its cantilever design provides smooth operation in all kinds of conditions. Looking for something unique? Consider a folding gate – its special design saves a lot of space in the driveway.

A reliable system

- Drive unit integrated with the post is WIŚNIEWSKI's proprietary solution for sliding gates.
- The structure protects the automatic operating unit from damage.
- The fence line is not interrupted by an additional element. The drive unit integrated with the post is nearly invisible.

Classic **form**

CE certificate –
safety

AWso Fast for sliding gates, with an innovative toothed rack hidden in the rail, ensuring a clean and minimalist look.

To ensure user safety and comfort, the gate drive unit is tucked away in the post integrated with the structure. This unique solution allows only authorized persons who have the key to access the control device, and the post also protects the mechanism from adverse weather conditions.

Resistant to weather conditions

WIŚNIEWSKI Connected

smart as standard

When you choose WIŚNIEWSKI Connected, you don't need a smart home central control unit. Selected WIŚNIEWSKI products are ready to connect as standard – you can connect them to the smart home without any additional devices or extra charges.
